

ASHISH SINGH

Ballia, Uttar Pradesh

singhashish150305@gmail.com | +91-9119960103 | LinkedIn | GitHub | LeetCode

Education

National Institute of Technology, Hamirpur
Bachelor of Technology – Electronics and Communication Engineering

Expected Graduation: 2027
CGPA: 8.66 / 10

Senior Secondary (CBSE)
Percentage: 96.2%

2022

Secondary (CBSE)
Percentage: 94%

2020

Technical Skills

Cloud: AWS (EC2, S3, ECS, EKS, CloudFront, ALB, IAM, SQS, DocumentDB), GCP (Cloud Run, Cloud SQL, Cloud Storage, Document AI)

DevOps: Docker, Kubernetes, Jenkins, Terraform, GitHub Actions, CI/CD, AWS ECR

Programming Languages: Python, C++, C, Bash

Backend: FastAPI, REST APIs, PostgreSQL

Tools: Git, Linux, Maven, SonarQube, Packer

Experience

LLM-Axis
Software Engineering Intern

May 2026 – Jul 2026
Remote

- Engineered FreightBot, a production-oriented freight marketplace platform, automating core logistics workflows through a WhatsApp-native interface.
- Designed and implemented scalable backend services, transactional workflows, and automation for real-world freight operations.

Aydus
Freelance Software Engineer

Jun 2026 – Aug 2026
Remote

- Developed CreatorPulse, a multi-platform creator analytics platform for unified content performance and growth intelligence.
- Delivered production-ready backend services, third-party platform integrations, data pipelines, and AI-powered analytics capabilities.

Projects

FreightBot – WhatsApp-Native Freight Marketplace

FastAPI | PostgreSQL | WhatsApp API

- Engineered a unified WhatsApp conversation platform supporting driver, shipper, and receiver workflows across KYC, load discovery, bidding, settlement, trip execution, and delivery.
- Designed layered Router-Service-Repository architecture with async SQLAlchemy, PostgreSQL row-level locking, idempotency, state machines, and transactional settlement.
- Built escrow, wallet, ledger, payout, invoice, notification, scheduler, monitoring, analytics, and document-verification subsystems for end-to-end freight operations.

CreatorPulse – Multi-Platform Creator Analytics Platform

AWS | FastAPI | Next.js | PostgreSQL

- Built a unified analytics platform for YouTube, Instagram, and TikTok to track content performance, audience metrics, and creator growth.
- Implemented OAuth integrations, token lifecycle management, asynchronous synchronization jobs, video-level metrics, and scalable PostgreSQL data models.
- Integrated Claude for AI-powered performance analysis and creator strategy recommendations; designed cloud deployment using ECS/Fargate, S3, CloudFront, ALB, and managed databases.

OpenAMI Guard – Automated AWS AMI Operations

AWS | Packer | EC2 | Inspector

- Built a plug-and-play AMI operations system for automated image hardening, patching, drift detection, and safe deployment updates.
- Implemented Packer-based image builds, AWS Inspector-triggered rebuilds, SSM automation, and automated AMI lifecycle management.
- Designed canary rollouts with automated promotion and rollback to reduce deployment risk across EC2 environments.

Position of Responsibility

SPEC, NIT Hamirpur
Technical Lead

Aug 2025 – Mar 2026
Hamirpur, India

- Led technical teams on software projects, contributing to system architecture, cloud deployment, backend development, and engineering best practices.
- Mentored team members through technical design, code reviews, debugging, and project implementation.
